HES® 9400 Surface Mounted Electric Strike

Works with rim exit devices up to 1/2" throw latchbolt

The slim-line, surface mounted solution.

The HES 9400 Series Electric Strike is a slim-line, surface mounted electric strike designed to accommodate rim exit devices with a 1/2" throw Pullman latchbolt. All components are completely encased within its 1/2" thick stainless steel housing, so no cutting on the frame is required for installation. Simply place the electric strike on the surface of the frame, align it with the exit latchbolt, and install.

An 1/8" spacer plate is provided to accommodate varying door gaps. The HES 9400 exceeds Grade 1 standards for strength and performance. It is field selectable for fail safe/fail secure operation, and for 12 or 24 VDC. The HES 9400 features a smooth cover to conceal the mounting screws and provide a sleek surface for superior looks.
