Pemko Pocket Frame Kit

Space Saving Solution

With the Pemko Pocket Frame Kit, doors slide into walls when opened. Space previously required for swing clearance can now be better utilized for decor or to give a more open feel. The Pemko Pocket Frame Kit is user friendly and precision-made to last for years. Door actuation requires less than 5 lbs of horizontal force, meeting ADA requirements. Kits are available for 2x4 construction with 3 1/2” stud, Wood 2x6 construction with 5 1/2” stud, and Steel 2x6 construction with 6” stud.

- Healthcare Facilities
Sliding Pocket Door Solutions

Sliding pocket doors are a great way to conserve space and recover space lost to swinging doors. They can also be used to add a door when swing clearance is limited. The Pemko Pocket Frame Kit has solid wood studs encased in extruded aluminum to reduce corrosion and minimize any bowing effect.

Technical Specifications:
- Heavy duty hardware supports doors up to 175 lbs. each leaf
- Door actuation requires less than 5 lbs of horizontal force, meeting ADA requirements
- Extruded aluminum track
- Solid wood studs encased in extruded aluminum reduces corrosion and minimizes bowing effects
- Chrome plated steel hangers are corrosion resistant and no maintenance is required

Materials Included:
- Header Track Assembly (1)
- Aluminum Cased Wood Studs (4)
- Pre-mounted Header Brackets (2)
- Hangers (2)
- Floor Cleats (2)
- Assembly Kit: mounting hardware, bumper stop, bottom guide, and adjusting wrench. For part numbers of kit components, see full line catalog.

Options:
- PF134KIT - Must be ordered for 1 3/4" doors
- *PFAS88 - An extra pair of 88" center studs with floor cleat for 84" tall doors
- *PFAS100 - An extra pair of 100" center studs with floor cleat for 96" tall doors
- PFCDKIT - Conversion Kit to achieve a bipart double door frame
  *Recommended for doors over 3' wide
