Right Hand Reverse Bevel

RHRB
2) Screw top bolt & rod assembly (A) and bottom bolt & rod assembly (D) into inner chassis (B).

3) Slide complete assembly into top of door.

4) Attach inner chassis (B) to door with (2) screws (GG).

5) Attach inside and outside ET Lever trims using ET mounting screws. Insert spindle thru 1-1/4" thru hole. Spindle cams must be UNDER inner chassis platform (C).

6) Adjust TOP BOLT AND ROD assembly (A) with the inside lever rotated in a down position.

   For 1/8" GAP OR LESS between top of door and door frame, rotate bolt even with top of door.

   For 1/8" GAP OR GREATER between top of door and door frame, rotate bolt to gap minus 1/8" above door.

7) Adjust BOTTOM BOLT AND ROD assembly (D) with the inside lever rotated in a down position.

   For 1/8" GAP OR LESS between door bottom and high point of floor, rotate bolt to make even with bottom of door.

   For 1/8" GAP OR GREATER between door bottom and high point of floor, rotate bolt to gap minus 1/8" below door.

8) Slide rod silencer (G) over top bolt (F) onto rod.

**NOTE:** The teeth on the rod should face the teeth on the top case.

9) SLIDE TOP case (E) over top bolt (F). Secure with (2) screws (HH).

10A) **For AD-7000 bottom bolt:** Install bottom plate (M) over bottom bolt (L) and secure with (2) screws (HH) using holes (6A).

10B) **For MD-7000 & 12-MD-7000:** Install bottom plate (M) over bottom bolt (L) and secure with (2) screws (DD) using tapped holes (7A).

11) Install door into the frame using hinges.

12) **650 Top Strike**

ATTACH 650 Top Strike to door frame. (2) #10-24 x 1/2" flat head screws (Reference template 4449).

13) **606 Bottom Strike**

Attach 606 Bottom Strike to floor under bottom bolt, (2) 1/4 - 20 x 2 Phillips head machine screws and (2) anchor nuts (Reference template 4449).

14) **BEFORE CLOSING DOOR**

Adjust bolts per steps 6 & 7 as needed:

a) Either lever retracts both bolts.

b) Bolts stay retracted (hold back).

c) Bolts release when door closes; button inside top of door hits frame.

d) Bolts engage strikes, 1/4" - 5/16".
Instructions for Installing NB-7000 & 12-NB-7000 Series
Concealed Vertical Rod Latch Device

Note 1) Measure gap between top of door and frame, and bottom of door and floor before removing door from hinges. (Ref. Step 6 & 7).

Note 2) For 100 Series Auxiliary Controls: Prep door BEFORE installing latching device. Install Aux Control AFTER installing latching device.

Note 3) For 100 Series Auxiliary Controls: Prep door BEFORE installing latching device. Install Aux Control AFTER installing latching device. For 106 or 113 Aux Controls: Template 4212; Installation instructions A5985.

1) Drill and countersink door per template.
2) Screw top bolt & rod assembly (A) into inner chassis (B).

3) Slide complete assembly into top of door.

4) Attach inner chassis (B) to door with (2) screws (GG).

5) Through bolt inside and outside ET Lever trims using ET mounting screws. Spindle cams must be UNDER inner chassis platform (C).

6) USE INSIDE TRIM to adjust TOP BOLT AND ROD assembly (A).

For 1/8" GAP OR LESS between top of door and door frame, rotate bolt even with top of door.

For 1/8" GAP OR GREATER between top of door and door frame, rotate bolt to gap minus 1/8" above door.
7) Slide rod silencer (G) over top bolt (F) onto rod.
Position top case (E) over top bolt (F).
Secure top case (E) to door with (2) screws (HH).

8) Install door in frame using hinges.

8) 650 Top Strike
ATTACH 650 Top Strike to door frame, (2) #10-24 x 1/2"
flat head screws (Reference template 4449).

9) BEFORE CLOSING DOOR
Adjust bolts per step 6 as needed:
   a) Either lever retracts bolt.
   b) Bolt stays retracted (hold back).
   c) Bolt releases when door closes; button inside top
      of door hits frame.
   d) Bolt engages strike, 1/4" - 5/16".
Instructions for Installing Classroom Function on 7000, 12-7000, NB-7000 and 12-NB-7000 Series Concealed Vertical Rod Latch Device

1. Through bolt the trim as described in Step 5 on pages 1 & 2. Ensure that the inside cylinder tailpiece engages the auxiliary cam on the outside trim.

2. Check for smooth locking and unlocking via cylinder on both sides of the door.

Remove components shown below in order to replace outside cylinder.

Reinstall removed components after cylinder is installed.
