Reduces Sound Transmission for Quieter Spaces

Pemko Acoustic Thresholds assist with sound attenuation, helping to muffle the sounds that travel through a closed door. Acoustic thresholds are especially useful in areas where noise levels are different, such as a door from a factory to a conference room, or from a music classroom or theater to the hallway.

Applications:
- Theaters, Auditoriums, Assembly Halls
- Sound Stages and Production Areas
- Conference Rooms
- Office Buildings
Acoustic Solutions

Acoustic Thresholds are only one element of a complete PEMKO acoustic solution. Pemko offers a wide range of perimeter gasketing, door bottoms and thresholds designed to assist with sound attenuation. In addition ASSA ABLOY Group companies can provide the other elements of the overall solution with STC Rated doors and frames.

Available finishes: A, D

Technical Specifications:

Threshold Material:
6063-T6 Aircraft Aluminum

Finishes:
Mill Finish Aluminum, Dark Bronze Anodized

Gasket Material:
Black ThermoSeal (STC) or Black PemkoPrene (PK)

Fasteners:
#10 x 1" sheet metal screws included. Other fastener options are available upon request at an additional charge.

Sound Rated:

Fire Rated:
Meets UL10C Standard as a Category J gasket.

Air Infiltration:
Air infiltration tested in accordance with ASTM E283-04.

ADA Compliance:
2008_PK meets the barrier free requirements of ICC/ANSI A117.1-2009. 2006STC and 2007STC are only ADA compliant when installed butted to other flooring materials in accordance with ADA guidelines.

ANSI/BHMA:
Meets the requirements of ANSI/BHMA A156.21-2014 Thresholds.

GREENGUARD Gold Certification:
Meets the product certification requirements for low chemical emissions of UL 2818 to Gold Status.
