9510 Series
Installation Instructions
Multi-Sized 1 thru 6
With Unitrol® Arms

Non-Hold Open Arm
Hold Open Arm

STANDARD APPLICATION WITH 9500-RB BRACKET
DEEP REVEAL APPLICATION WITH 9500-DRK CLAMP KIT
FLUSH PARTITION APPLICATION WITH 9500-FPB BRACKET

IMPORTANT:

- An improperly installed or incorrectly adjusted door closer may cause property damage or personal injury; and will void product warranty.
- To avoid personal injury, **DO NOT DISASSEMBLE THIS DOOR CLOSER BODY.**
- Door closers must be securely fastened to a properly reinforced door and frame with fasteners provided.
- Door closers with a HOLD OPEN ARM are not permitted to be installed in fire door assemblies.
- Door and frame must be specifically templated for 85°, 90°, 95°, 100°, 105° or 110° door swing.

**Note:** Wood doors/frames: drill 1/8” (3.2) pilot hole when using Self-Drilling Screws.

Always consult door/frame manufacturer for fastener compatibility with the material of their door/frame.

- It is recommended that the door, on which the door closer will be installed, be hung on ball bearing hinges. Door must swing freely.
- A separate door stop, supplied by others, is recommended to prevent damage to the door closer, closer arm; or to the door, frame or adjacent walls.
- Door and Frame must be properly reinforced, or use of special fasteners employed, to prevent the mounting screws from pulling out.
- All dimensions are given in inches with corresponding metric dimensions (millimeters) in parentheses.
Parallel Arm Template

Standard Application with 9500-RB Bracket Template

NOTES:
• Check hand of door, see page 2.
• Right Hand Application Shown. Left Hand Opposite.
• Dimensions given in inches (mm). Do Not Scale Drawing.
• Closer must be installed mounted level to ensure proper closer performance.

Frame Reveals 1-7/8" to 4-5/8"
(48mm to 117mm)
NOTES:
• Check hand of door, see page 2.
• Right Hand Application Shown. Left Hand Opposite.
• Dimensions given in inches (mm). Do Not Scale Drawing.
• Closer must be installed mounted level to ensure proper closer performance.
Parallel Arm Template

Flush Partition Frame Template Application With 9500-FPB Bracket

Frame Reveals 0" to 1/8" (0mm to 3mm)

9500-FPB BRACKET

Reveal

9500-FPB BRACKET

NOTES:
• Check hand of door, see page 2.
• Right Hand Application Shown. Left Hand Opposite.
• Dimensions given in inches (mm). Do Not Scale Drawing.
• Closer must be installed mounted level to ensure proper closer performance.
Parallel Arm Installation Sequence

NOTE:
- See chart to select degree of door opening and Door width for your door. Then, determine frame condition: STANDARD & DEEP REVEAL (use Dim's A & B) or FLUSH PARTITION (use Dim's A & C).
- MINIMUM TOP RAIL for Standard Application: 5" (127)
- MINIMUM TOP RAIL for Drop Plate Application: 2" (51)

*Dimension "C" is only used for Flush Partition application (page 3).

<td>8 (203)</td>
<td>8-1/8 (206)</td>
</tr>
</tbody>
</table>

*Dimension “C” is only used for Flush Partition application (page 3).

- Select angle of opening and use dimensions shown in template to locate 4 holes on door for Closer Mounting Bracket (or 4 holes for optional drop plate) and 4 holes on jamb for arm bracket (additional holes required for optional brackets).

For applications that are different from above, a separate template will be supplied for door and frame preparation.

- Prepare door and frame for fasteners using "Preparation for Fasteners" chart, Figure 2, Page 4.

- Fasten Closer Mounting Bracket to door. Fasten optional drop plate to door, only if it is required for the door conditions.

- Install closer body with tube end away from hinge, with valves:
  - **Down** for Left Hand door
  - **UP** for Right Hand door

- Attach arm to door frame.

- Connect arm to closer. Using hex wrench provided, turn closing speed and latching speed valves clockwise until completely closed. DO NOT OVER TIGHTEN.

- Open door to approximately 60°. Using wrench on underside of spindle, rotate spindle approximately 135° toward hinge edge of door. Install arm on spindle at an approximate 90° angle to door. Reopen CLOSING SPEED VALVE. Install and tighten 5/16 Hex Head Arm Washer and Screw Assembly.

- Make closer adjustments using information on page 9, then install closer cover.
Spring Power Adjustment

Locate spring power adjuster from Illustration below

Size 1 thru 6 Adjustment See Chart

SPRING POWER ADJUSTMENT CHART

- All 9500 closers are factory set at an approximate Size 3.
- Adjust closer as necessary for door size using this chart.
- Readjustment may be required to suit prevailing conditions.

LATCHING SPEED VALVE

CLOSING SPEED VALVE

BACKCHECK INTENSITY VALVE

OPTIONAL DELAYED ACTION VALVE

SPRING POWER ADJUSTER

(1/4" ALLEN WRENCH)

Closing Speed Valve  (1/8 Allen Wrench Provided)

Factory preset for typical doors.
To adjust speed of door closing from fully open to a position 2" to 5" from closed, turn Closing Speed Valve CLOCKWISE to SLOW closing, COUNTER-CLOCKWISE to SPEED closing.

Latching Speed Valve  (1/8 Allen Wrench Provided)

Factory preset for typical doors.
After closing speed has been obtained, turn latching speed valve CLOCKWISE to SLOW latching or COUNTER-CLOCKWISE to SPEED latching for last 2" to 5" of door travel.
NOTE: Set combination of CLOSING and LATCHING speeds to between 3 and 7 seconds Use of door by handicapped, elderly or small children may require even greater closing time.

Delayed Action Valve  (1/8 Allen Wrench Provided)

Factory preset for typical doors.
Turn valve CLOCKWISE to SLOW closing, COUNTER-CLOCKWISE to SPEED closing. Delayed action may be adjusted from 20 seconds to 90 seconds, depending on degree of door swing. Delay occurs at the beginning of the door closing cycle from fully open down to 70°, where the closing speed valve then begins its control.

Backcheck Intensity Valve

Factory preset for typical doors.
Turn valve COUNTER-CLOCKWISE to reduce backcheck or CLOCKWISE to increase backcheck. (Backcheck should be set to give a soft cushioning action, not a sudden stop.)
Installing Cover

- Slip cover over closer.
- Hold tightly against Closer Mounting Bracket surface.
- Secure on each side with 6-32 x 1/4" screws.

Hold Open Adjustments

- Hold Open “On”
- Hold Open “Off”
- Hold Open Force
- Rotate
  - To Decrease Hold Open Force
  - To Increase Hold Open Force

Plastic Cover (Standard)
