*NOTE: 3500 PSI is minimum requirement for frame anchors. Required wall concrete strength may be greater.*

Jamb anchor locations may vary provided that the spacing on either side of each jamb anchor does not exceed dimension “A” in table above, distance from bottom corners does not exceed 8", and distance from top corners does not exceed 4”. Head anchors shall be provided as shown. Anchors may have up to 1/4" maximum load bearing shim. Anchors may be installed through existing embedment plates, provided that drilling through existing embedment plates is permissible as verified by others. Any existing embedment plates shall be designed and verified by others. Edge distance and embedment noted herein is to concrete only and does not include any embedment plates or finishes.

*Signed and sealed anchor calculations available upon request.*
