PRODUCT SPECIFICATIONS:

2-1/2” Thick acoustical steel door system shall be as provided by FLEMING Door Products. Doors and frames shall conform to the Steel Door Institute guide specification, ANSI A250.8 as applicable. The door skin thickness is 18 gauge.

The doors and frames are commercial quality A40 galvanneal steel conforming to ASTM A653 & ASTM A924. Acoustic core and internal construction is manufacturer’s proprietary standard as tested in accordance with ASTM E90, E413, E1332, & E2235 to furnish the STC rating specified. Door systems are in compliance with HMMA 865 & SDI-128 specifications. A physical door label is applied to certify the product and identify the specific rating. The label will be applied to the door only and there will not be a label applied to the frames. Frames are double rabbet profile of continuously welded construction and are available for any masonry acoustic wall system application. They are constructed of 16 gauge min. or 14 gauge max. to provide the STC performance specified. Mutes/Silencers are not allowed in these frames. The frames must also be mortar filled to achieve the STC rating.

Hardware Provisions:
Doors and frames will be supplied reinforced for a Pemko continuous hinge. The door lock edge has a standard bevel and is prepared for a Sargent 11 line (ANSI A115.1) cylindrical lock. A 3/4” latch throw is required. The lock jamb preparation is for 4-7/8” high strike (ANSI A115.1 or 2).

Paint:
Doors shall be provided with one coat of oven-cured neutral color prime paint. Primer coat shall conform with ANSI A250.10. Finish coats are also available, for the door only, from a selection of standard colors (optional). Finish coats are electrostatically applied, oven-cured urethane enamel, and shall conform to ANSI A250.3. Finish paint can be provided, upon request, for the door only.
